600 West 3rd Street Florence, CO 81226
(719) 784-4848, option 5
cortlyne.huppe@florencecolorado.org

NOTE TO ALL BIDDERS : Despite the answers to these question, all bidders are still being asked to submit an additional bid with the original machine specs if possible. We understand that there are machines out there that cannot meet the original specs, but if you have one that will, please submit both bids.

A. Operating weight of 7,500 pounds, can we increase the weight to 8,000 pounds?

No. The equipment must conform to the provided requirements.

B. The length of the machine is 144 inches long, can we increase the length to a maximum of 151.9 inches long?

No. The equipment must conform to the provided requirements.

C. Must the skid steer be a vertical lift? Can the machine be a radial lift?

Yes. The skid steer can be either a vertical lift or a radial lift.

D. Can the operating weight exceed the 7,500 lbs by 697 lbs?

No. The equipment must conform to the provided requirements.

E. Can the high flow hydraulic requirement be bypassed if needed implements can be given that are within the range of the hydraulic flow currently on the machine? If the high flow is available at a later date?

Yes. The high flow requirement can be bypassed if the hydraulic flow of the machine can operate the requested implements and if high flow will be available at a later date.
